WHAT IS VIVALDI iFREE ?

IN-WALL STAND ALONE AMPLIFIER FOR MULTIROOM AUDIO APPLICATIONS

HOW TO INSTALL
iFREE fits a standard 60mm round or square in-wall electrical box (UK/European switch standard), and can be used as stand-alone without any special wiring or in a multi-room interconnection with a main unit.

SMART INTEGRATION
With iCONTROL series products you can integrate with your smart building at different levels. Send display pop-up messages with chime to any device.
Activate room thermostat functionality and view local weather information.

PROFESSIONAL AUDIO QUALITY
25+25W class D amp, DSP with 7-band EQ, independent pre-out settings, volume limit, auto ON/OFF mode; energy save amp, balance adjustment, mono/stereo settings.

BLUETOOTH 5.0
Customize the device name. HFP (Hands Free Profile): use your iFREE for phone calls or music playback, talk through the in-built microphone.

INTERCOM / PAGING FUNCTIONALITY
One-to-one or one-to-all intercom call. Connect an external microphone base and activate the internal chime to turn iFREE into a professional paging system.
